CEI Evaluation	01/10/2019	Activity Location:	NJ	By:	STATE	Identifier:	001	Person:	NOSDS	Suborganization:		Found Violation:	NO
NOC Date:		Citizen Complaint:	NO	Multimedia Inspection:	NO	Sampling:	NO	Not Subtitle C:	NO	Day Zero:	01/10/2019	Focus Area:	
Eval. Notes:	On 1/10/19 the Department conducted a routine RCRA inspection at Symrise Inc. (Symrise) (NJD070570122), located in Teterboro, NJ. The facility representative was Mr. Augustine E. Ogonnaya, EHS Specialist. Symris was assessed as a large quantity generator (LQG) of hazardous waste. Symrise was last inspected on 11/10/15 by Mrs. Maria Petix-Kent (NJDEP). Symrise is an international flavors and fragrance manufacturer. This facility develops both flavors and fragrances for the food industry. Site operations include research and development (R&D) laboratories, numerous labs specializing in food tasting & flavor creation, and quality control testing of the raw materials and intermediate products produced that are eventually used in various baking & food products. Production operations also occur onsite which include liquid mixing & blending, and sampling & flavoring packaging of products. Symris is a small quantity handler of universal waste, specifically waste lamps, and batteries. Symris is also a generator of regulated medical waste (Generator ID #0386391). Through June 2018, Symrise was registered as a Category 1 generator of some Class 3 and Class 4 RMW from a nurse's station onsite. However, by August 2018, Symrise had shut down the nurses station, but had installed, and began operating a new Cosmetics & Ingredients Lab onsite, which now generates Class 1 - Cultures & Stocks RMW, in Category 5 amounts of RMW. Because the nurse's station was closed down, Class 3 & 4 RMW is no longer generated onsite. See associated Word document for a complete inspection report.												

No Linked Violations

Eval. Notes: An LQG-CEI Standard Compliance inspection was conducted for the above facility. The last RCRA inspection was conducted on 3/9/10 with drum management label violations for hazardous and Universal waste. Symrise manufactures flavors and fragrances used as intermediates in foods, aerosols and other products. The site operates an R&D lab and a QC lab along with production for both flavors and fragrances. Production activities include liquid mixing/blending with sampling and flavor packaging of products. After every batch job, the tanks are cleaned with soap and water and discharged to the domestic sewerage authority (Bergen County Utilities Authorities) under a permit. Samplings of the batches are done using liquid or gas chromatography machines (HPLCs). Hazardous waste is generated from the HPLCs and spent sample vials containing ethanol (D001), lab wastes (ethanol, methanol and acetonitrile, off-spec waste (D001) from the flavors, and waste raw material (oils). Used oil is generated from servicing the compressors. Universal Waste (i.e. bulbs, batteries, and electronic components) is generated on-site and sent out for recycling. Regulated medical waste is also generated on-site (< 25 lbs/yr) and taken by a contracted traveling nurse (see attachment list for nurse's certificate). The nurse is authorized to self-transport the RMW sharps container to a registered site (Passport Health) and had no tracking form at the time. After this inspection, Mr. Golden stated that both the Symrise facility in Branchburg and Teterboro will be storing the RMW at the generating locating. No stewardship was noted at this time. No violations at this time.

No Linked Violations

Note: Penalty information associated with an enforcement action is reported with the enforcement action. For enforcement actions associated with multiple violations, the penalty information will be reported with each violation, however, the penalty is only assessed once, regardless of the number of violations associated with the enforcement.
